

AETHER M6 adaptive fidelity · run M6-AF-20260920T211148Z · F1 backend: openfoam
Each arm's FINAL drag surface against the pooled-truth surface on one common probe set: 72 points (shapes of the reference front x the declared Mach nodes). One marker per seed, bar = mean. Pooled truth is itself a surface; its measured error is in the report's hold-out table.
